Mountain Weather Forecast

Eryri (Snowdonia) National Park

Forecast valid from 06:00 on Saturday 11 Nov 2023 until 23:59 on Sunday 12 Nov 2023

Forecast Issued on Saturday 11 Nov 2023 at 00:37

Confidence: High confidence for a settled day on Saturday with sunny spells, lower confidence around fog development. Turning unsettled again later on Sunday but some uncertainty on timings of the rain's arrival, remaining unsettled for the start of the new week.

Headline for Saturday 11 Nov 2023: Any mist and fog clearing to leave a bright and dry day, feeling chilly in brisk winds.

Forecast for Saturday 11 Nov 2023

Weather: A few showers are possible at first, but much of the park will be dry and clear, and feeling cold with frost, mist and fog patches in more sheltered areas. Mist and fog will clear this morning to leave a bright day with patchy cloud and sunny spells. Dry with long clear periods this evening and temperatures quickly falling.

Chance of cloud-free hill tops above 800m: 60% rising to 95%.

Low Cloud and visibility: Poor visibility at low level in mist and fog, especially in valleys, but likely good visibility towards the mountain tops. As fog lifts and clears summits may see patchy or scattered cloud shrouding them for a time. By late morning very little low cloud is expected with far reaching views likely throughout the day. Mist and fog patches may reform into the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Brisk winds will bring a significant wind chill, especially early and late today. Feeling chilly out of the sunshine.

Forecast for Sunday 12 Nov 2023

Weather: Dry and largely clear at first then becoming cloudy, with outbreaks of rain arriving at the end of the night. This will fall as sleet or snow initially on the higher tops. Further spells of rain during the day, sometimes heavy, then becoming dry and clearer conditions will arrive from the southwest late in the afternoon.

Maximum wind: Southeast 30 mph gusts 45mph

Chance of cloud-free hill tops above 800m: 90% falling to 40% by late afternoon, low cloud associated with rain.

Low Cloud and visibility: Where mist and fog patches have formed visibility will be poor for a time early in the morning. Through the morning and afternoon scattered or broken cloud above 500m can be expected, with moderate or poor visibility at times.

Temperature: **Valleys:** Plus 1 rising to 7 Celsius.
At 800m: Plus 1 Celsius rising to Plus 4 Celsius later.
Freezing level: 900m rising above all summits.
